

# Globe Forum

**Globe Forum Accelerator Program –  
for innovation companies who want to achieve a  
more rapid market growth**

**Globe Forum has in place since 2008 an accelerator program for sustainable innovation companies with the objective of strengthening the participating companies' commercial activities and provide opportunities to enter new markets. We also offer Nordic cleantech companies an opportunity for international growth through our global network of agents.**

We act as an advisor in fundraising for the companies which we believe have the potential to succeed. All companies wishing to participate in the program would be offered a free screening process in which many factors are reviewed in order to identify what needs to be developed and improved. The autumn program begins on 20 August 2011, so please contact us as soon as possible to guarantee participation in Globe Forum's invaluable Accelerator Program.

#### **The program comprises:**

- strategy development and business planning
- presentation and sales training
- fundraising opportunities
- guidance for expansion into new markets
- company visits
- mentoring

Globe Forum acts as a link between innovative companies and the wider market in order to accelerate innovation processes thus creating the optimum conditions for innovative companies. This breeds ideal opportunity in gaining access to potential customers and capital. Our online marketplace [www.globeforum.com](http://www.globeforum.com) serves as a meeting place for the various parties to work together helping innovative companies make the right moves in competitive markets.

In addition to the major international forums we organize, we have branched out, creating the successful Globe Forum Tour. A number of Swedish cities are chosen where, through an entertaining day's program of panel discussions and innovation contest, showcases local innovations, entrepreneurs and development projects. Program participants are given the opportunity to interact with at least five cities.

By participating in our program, your company will take advantage of global networks of people spearheading change through exciting and ground-breaking innovation.
